Red fire, bunting and arches will not honor this great man in the manner he deserves. There is a better way. Let us emulate his courage, his fearlessness, his patience, his gentleness in a better way. Let us erect a memorial that will be national; a memorial that will for all time. Let courage and honor be its base, intelligence its side and the keystone truth.

Why could not we raise by popular subscription, by National and State donations, the money to erect a Dewey University at Manila, the scene of the honoring? In such a memorial we will have the means of educating and raising up the brothers of our adoption.

FOLLIES OF HERO WORSHIP.

A PULPIT CRITICISM OF THE DEWEY CELE-BRATION.

One preacher in Brooklyn yesterday was inclined to throw cold water on the unparalleled enthusiasm The sermon was delivered in the Tompkins Avenue Methodist Episcopal Church, Tompkins and Wilbration. A handsome American flag hung over the rails, and prior to the sermon the choir sung "The

The speaker based his discourse on the story of Paul, after being wrecked on the island of Melita, being bitten by a viper. The barbarians thought he must be a prince of murderers, whose Nemesis, after he had escaped at sea, had caught him on land. When they saw him shake the viper off, they cried out that he must be a god. There was no basis for either view. There was no ground for calling him either a murderer or a hero.

The preacher said that the spirit of hero worship is firmly implanted in the human heart, and has existed since the earliest times. At all times hero worship has found expression in the admiration of human beings. Hero worship finds expression in such opposite nations as America and China. The folly of hero worship is not to consider the character of the hero and to ignore the accidents that have shed lustre on the career of all heroes. Had not certain accidents happened to Paul, he would not have been a hero. He might not have gone to Melita; he might not have lit a fire, the viper might have struck some other man, and then Paul would not have been a hero. If England had not restrained Germany at Manila, had there been European complications, had Cervera's fleet not been bottled up, we might be fighting yet, and there might he a different tale to tell. To-day the people call their bric-h-brac, their children and their cigarettes after Dewey, but if he were to run for some political office the probabilities are that he would be splashed with mire by the unscrupillous. This fickleness is another of the follies of hero worship. The speaker based his discourse on the story of

AUGUST BELMONT TO GOEBEL.

A REPLY TO THE CHARGE THAT THE RAIL-ROAD IS LEADING THE FIGHT

according to a dispatch from Louisville, written a second letter to Senator William Goebel, the Demoletter Mr. Belmont replies to the charges made by against him (Goebel) because of his silver views. The letter in question is said to be as follows:

against him (Goebel) because of his silver views. The letter in question is said to be as follows:

Louisville and Nashville Railroad Company, Equitable Building, No. 120 Broadway, New-York, September 18, 1899.
The Hon, William Goebel, Kenton, Ky.
Dear Sir: As was your privilege, you gave publicity to my letter to you of August 18, and you have at various times referred to the same in your speeches in a manner to show that you view it as a good campaign document. While you have tried to turn it from its real purpose. I doubt whether it has been misunderstood in the manner in which you proposed it should be.

You have persisted in your endeavor to connect me with your campaign as being prompted by a desire to maintain the gold standard. The statement on this subject in your Mayfield speech was too absurd, in my opinion, to need more reference to than I gave it in my letter. However, you draw attention to the fact that I made no specific denial. I do so now, in order to oblige you, for the silver or gold question has nothing whatever to do with the attitude of the Louisville and Nashville Railroad toward you.

This question does not disturb me at all. I have been and am quite willing to let the prosperous condition of the country and the practical lessons taught by the present revival of business stand as a sufficient argument to enable the people to reach a proper decision as to whether they desire a gold standard or not.

Independently of this, your candidacy has never disturbed me, because I have always looked upon you as a very thorough sound money man. I believe I am not violating any confidence in saying that I have seen letters which you wrote to the Hon. John G. Carlisle in 1806, showing that you were co-operating with him to carry Kenton and other counties for the sound money cause, and you exerted yourself, to my knowledge, actively in that direction. I have other proofs which certainly would have led any one to feel quite at ease respecting your position on the money question.

Therefore, my dear Mr. G
